ROSES OUR SPECIALTY

"Quality" rather than quantity is given first consideration at "Rosemawr" in their production.

OUR Roses are grown in as cool a temperature as possible; they are on their own roots, and plenty of room is given for good healthy action and growth. We endeavor to grow the very best roses that can be grown and earnestly solicit an inspection of our stock by all our customers. It has always been our policy to give good value for the price charged. We give personal attention to every branch of our business, being particularly careful to give liberal count and to pack all orders that are to be shipped by express in a light and secure manner.

THE AMERICAN PEDIGREE CANNAS

Originated on our grounds. Each year we have introduced new varieties till our list now covers all shades of colors known to Cannas. No other strain has reached such perfection in colors, or in the beautiful form and profusion of its flowers, and the general excellence of the whole plant. On our exhibit of 34 varieties (all originated by ourselves) at the St. Louis World's Fair, we fairly won the Grand Prize, the only Grand Prize awarded to Cannas.

We have a large building entirely devoted to storing Canna roots—over 80 leading varieties are stored in this Canna House, besides many unnamed seedlings that are being carefully tested. We carry the most complete assortment and decidedly the largest stock of Cannas in America.

HARDY CLIMBING ROSES

PHILADELPHIA RAMBLER

INTRODUCED BY THE CONARD & JONES CO., WEST GROVE, PA.

The Most Magnificent Hardy Crimson Climbing Rose in Existence

"PHILADELPHIA RAMBLER" blooms two weeks earlier than Crimson Rambler. Flowers are exceedingly bright, very double, lasting and durable. Excels all others as a forcing rose. "Philadelphia Rambler" has splendid flowers, 1½ to 2 inches across and perfectly double. Born in grand clusters, completely covering the whole bush. Color, deep rich crimson, far brighter, more intense than "Crimson Rambler," which has heretofore been the standard for brilliant color. The Philadelphia Rambler does not fade, bleach or wash out, but holds its bright dazzling color to the last, which adds greatly to its value. Has handsome foliage not subject to mildew, and is a most abundant bloomer. Undoubtedly the brightest of all Hardy Crimson Climbing Roses yet produced.

FARQUHAR ROSE—Originated in Boston, Mass., and is a true hardy climber or "Rambler." Grows 10 to 12 feet in a season, is entirely hardy, has handsome foliage and bears immense clusters of large double bright pink flowers.

"LADY GAY"

The introducers say "this Rose is far superior to Crimson Rambler," of which it is a seedling and which it closely resembles in habit of bloom and vigor of growth. The flowers (in large loose clusters) are of a delicate cherry pink color, fading to soft tinted white. The effect of a plant in full bloom with the combination of soft white flowers, cherry pink buds and deep green of the foliage is indeed charming. It is perfectly hardy and unsurpassed for climbing work. 2½ inch, 75 cents per dozen; \$4.50 per 100. 4 inch, \$2.50 per dozen.

NEW MEMORIAL ROSE *Alba Rubifolia*

The flowers are pure white, and much of the foliage and young growth is bright red. It is appropriately named *Alba Rubifolia*. When trained up to a post or a pillar it soon makes a beautiful weeping bush, or it may be left to form a deep mat of leaves and flowers on the ground. It is evergreen and retains its foliage well into Winter, which adds to its beauty. Its round, thick leaves are so bright and glossy they shine as if varnished. The flowers are medium large and fragrant, perfectly full and double to the centre, and remaining bright and fresh a long time after opening. It is entirely hardy, needs no protection, always looks bright, cheerful and is undoubtedly the finest memorial rose for cemetery planting yet introduced.

MEMORIAL ROSE EVERGREEN GEM—Large, double, buff yellow flowers.

MEMORIAL ROSE DOUBLE WHITE (Maudslayi's Triumph)—Pure double white flowers.

GARDEN'S GLORY

A grand New Pillar Rose—a seedling from Dawson x Clotilde Soupert. It is entirely hardy, a strong grower, and almost thornless. The flowers are large, very double and borne in clusters. Color is deep pink and creamy white outside. A very desirable Hardy Climbing Rose.

Dorothy Perkins

Much has been said of this splendid new Hardy Climber. It grows 10 to 15 feet in a season, blooms in immense clusters like the Crimson Rambler, but the blooms are more double and of a beautiful shell-pink color passing to deep rose.

RUBY QUEEN

RUBY QUEEN is a very Hardy Climbing Rose. It is a strong vigorous upright grower, and is particularly well furnished with a glossy, green leathery foliage. The foliage has a peculiar but pleasing fragrance. This fragrance, while pleasing to mankind, seems to be very repulsive to insect pests, and makes the bush almost proof against their ravages. The color is different from any other rose, and is hard to describe. We call it Ruby Red, but this term only conveys a faint idea of the beautiful color, or how nature has shaded this color from lighter petals in the centre to darker petals outside. The flowers are double, medium to large in size, and are borne in clusters. It is recommended for situations where slug-eaten foliage is not desirable.

MAY QUEEN

Similar to Ruby Queen excepting that the flowers are larger in size, and bright pink in color. The flowers are unusually full and double and of fine form.

PEARL QUEEN—The bush is like May Queen. The flowers are pure pearl white, with deep rose centre, large in size and very full and double, having exquisite form.

NORTHERN LIGHT—It is a strong upright grower and enormous bloomer, bearing great masses of beautiful pink and white roses of such different shades and combinations of color that the name "Northern Light" or "Aurora Borealis" was naturally suggested. Flowers are of medium size. The color of the flowers varies from deep pink to blush white. 2½ inch, 60 cents per dozen; \$4.00 per 100. 2 year field plants,

Mont Blanc

—THE—

Snowy White Canna

MONT BLANC was introduced by us in 1902 and is today by all odds the finest white Canna in commerce; in fact, there is no other variety that can compare with it. It has a vigorous constitution, blooms early and continuously in the greatest profusion during the whole growing season. Its foliage is bright glossy green, very large and handsome, and so thick and leathery it is not often injured by rain or wind. Its great masses of snowy white blossoms contrast finely with the splendid crimson and pink varieties, making the most gorgeous and showy flower beds for the lawn or garden it is possible to have. See illustration from photograph. 20 cents each; \$1.50 per dozen; \$10.00 per 100.

OTTAWA

is a strong grower, very robust and 5 to 6 feet high. The flowers are large and beautifully formed, color is carmine with tints of old rose and deep coral, add to this the silken sheen and you can imagine the effect a few plants will produce.

Note—We had this canna on trial among the Canadian experiment stations last Summer and this is the official report of their expert:

"Quite distinct and one of the most beautiful shades of color I ever saw in cannas. Of the 70 massed in one bed during the past season, this was the most floriferous in the collection, coming in bloom early and continuing until cut down by frost, as many as 13 expanded heads of bloom being counted at one time on a plant, and not a poor one among them, all being of immense size. 35 cts. each; \$3.00 per doz.

JAUNTA (1905)—Foliage very dark green, strikingly edged with bronze. Branching bloom spikes gracefully draped in flowers of rich chrome yellow. 25 cts each; \$1 per doz.

WILLIAM SAUNDERS

ORIGINATED and INTRODUCED BY
The CONARD & JONES COMPANY, 1907.

A rich shining scarlet, produced in great clusters often a foot across and each on branching stems about 4 feet high. Individual flowers, often 5 inches across, of remarkable substance and durability. It is a strong, vigorous grower and self-cleaning, which means flowers fresh every morning from June till frost. The foliage is a rich bronze. "Wm Saunders" Canna has never yet failed to win first prize. In dedicating this Canna to Dr. Wm. Saunders, of Ottawa, Mr. Wintzer, originator, says of it: "Of the many thousands of hybridized seedlings produced by me, none approach nearer the ideal Canna this peerless variety." Geo. H. Brown, Landscape Gardener, U. S. Public Buildings and Grounds, Washington, D. C., during a visit to our Nurseries last Summer said:

"You have the finest
Cannas in the world. I
congratulate you."

C. & J. Cannas will
beautify the Govern-
ment grounds at Wash-
ington, D. C., this next
season.

This illus-
tration (paint-
ed directly from
nature and pho-

Venus (4 feet, C. & J., 1906)—Venus is a
great favorite with visitors here,
just as it was at the St. Louis World's Fair
in 1904, where it was exhibited among our
famous unnamed seedlings. The color is a
gay rosy pink with a mottled border of
creamy yellow. It blooms splendidly with
heads erect and flowers bright, because the
old ones drop off as fast as the new ones
come. Has a good constitution; green foli-
age. This is one of the cannas that seems
to please every one who sees it. 15 cts. each;
\$1.00 per dozen; \$6.00 per 100.

Jupiter (C. & J., 1906)—We take pleasure
in introducing this magnificent
specimen of the Canna race. Imagine a plant
6 feet high and furnished right down to the
base with an abundance of deep purple foli-
age; some leaves 1 foot wide and 3 feet long,
and nearly as dark as Black Beauty. The
flowers are rich red and have a most effective
manner. 15c each; \$1.00 per doz.; \$3 per 100.

CHAMELEON (1905)—Flowers change col-
or; they open a rich orange striped with red,
then turn to yellow and rose pink. 5 feet.
20 cents each; \$1.50 per dozen.

— NOTICE —

WE make a specialty of growing new Cannas. Several thousand new seedlings are started each year, and we think that we are quite safe in saying that the great variety of colors presented in these trial fields cannot be duplicated anywhere else, the world over. These are not all chance seedlings by any means; many of them come from seed that has been carefully hybridized, and the improvement that comes from careful work of this kind is very noticeable. We have had several generations at times growing in the same patch, and it is truly interesting to notice the great advance in color, form and durable qualities that has been produced by the work of the careful hybridizer. These Canna patches are always interesting to look over during the latter part of the Summer, and we extend a cordial invitation to all our friends to come and see them.
